Dear Igor, Maria, Vitaliy -

It has been my pleasure to have had breakfast with all of you. Thank you!

Let's not fret about titles they do not impress me. I have an extraordinary dedication to the science of Holography. I give my soul to it, and my palette is full.

It is a privilege to do what I do. Having the opportunity to help the few eventually will help the many. When we invest in people slowly our visions become reality, the great joy of the journey.

Einstein said "A spark of Science is enough to light a child's mind" This direction is essentially my primary mission, to inspire teachers, children, educate the general public as it is Igor and you privilege to continue Holography's promise. I find our meetings very stimulating.

Sincerely,
Loren
