June 6, 2006

Dear Mr. Wesly:

I would first like to take this opportunity to thank you for your interest in FUJIFILM Silver Halide Holographic Film- F HL..

Your supply of test film is enclosed; 5- 4" x 5" sheets. The film should be used in total darkness or with a dark amber safe light filter as suggested in the technical specifications.

The labeled, cardboard envelope has a plastic, light tight envelope inside that holds the film. The film is packed between cardboard with the emulsion, concave curled side, facing the tape on the out side of the plastic envelope.

The film does NOT have a notch to identify the emulsion side so take care in noticing the orientation of the film as described above.

I have also included a technical data sheet and catalog of the available sizes. Orders are accepted by either going to our web site, www.fujifilmholography.com, by calling 1-800-344-1847 ext. 60 or by fax 1-201-995-2443.

Your test results are very important to us, so please let us know what you think of the film.

Thank you again for agreeing to try our new film. If you have any question, please do not hesitate to contact your sales representative or myself.

Yours very truly,

FUJI HUNT PHOTOGRAPHIC CHEMICALS, INC.
