

# TECHNICAL INFORMATION

## ORWO Holographic Film GF 40

**Product description:** The ORWO Holographic Film GF 40 is designed for recording of holograms on chromate sensitised gelatine. The film has a layer of pure photo gelatine. The chromate sensitisation has to do by user.

**Base:** safety base, triacetate, thickness base + emulsion 125 µm.

**Spectral response:** after sensitisation from ultra violet to blue-green, UV-laser, Ar<sup>+</sup>-laser or analogous wavelength are usable

---

**Availability:** standard assortment

rolls:  
usable width                      length  
    104 cm                              10 m  
    104 cm                              30 m

sheets:  
50 cm x 60 cm                      25 sheets per box

---

**Storage:** < 18 °C at (55 ± 10) % relative humidity

**Manufacturing:** upon request
